# What is this Ingenious Furniture Lifting System ?

An ingenious jacking system literally lifts up workstations right there on the spot so that the old carpet can be removed and replaced with zero disruption!

Meanwhile,  
phones,  
computers and all  
other items of  
office equipment  
stay as they  
should -  
connected!

As professional flooring contractors we also offer this service outside normal working hours. This effectively eliminates the enormous cost of employee downtime and loss of productivity.

# The Ingenious Furniture Lifting System - Summary

**Features**

**Benefits**

**No dismantling or reassembling of furniture**

There is no need to employ a specialist furniture removal company.

**No boxing or crating the contents of desks or work surfaces**

As desks and panels remain in their existing locations, there is no requirement to find storage and no risk of damage from furniture movement.

**No Disconnection or reconnection of telephones, computers and electrical equipment**

There is no need to employ a crate hire company. Because there is no packing or unpacking, it will not be necessary for the staff to suffer downtime.

Papers, files, etc. will stay on the desks where employees left them the night before.

There is no need to employ IT specialists, electricians or telephone engineers. The following morning members of staff will continue to have unimpeded access to communications equipment, etc.

**No disruption**

The enormous 'impact' costs of employee downtime and loss of productivity are eliminated.

**No co-ordination problems**

As no other trades are involved any programming complications or 'split' responsibilities are eliminated.
